AWS Basics

-User: lincoln.harris
-Old swat mail password
-dont use .pem (key file)!
-server to use: Us-west-2
-Services ->
    Storage -> s3
    Compute cluster -> EC2
-EBS store only
-Instance storage is temporary
    -best thing to do: run job on instance, pull down output,   terminate instance
    -versus actually storing data on s3
-Terminate vs stop
-Holy shit!!!!

NEED TO RUN
> pip install aegean

CMD HISTORY
>aws help
>aws s3 ls s3://czbiohub-maca/
>cd ~/Desktop/
>ssh -i Lincolnharris-1.pem.txt ubuntu@52.24.134.27
>chmod 400 Lincolnharris-1.pem.txt
>ssh -i Lincolnharris-1.pem.txt ubuntu@52.24.134.27
